INTRODUCTION

Special Materials Services (Child Care and Development Branch) of the Manitoba Department of Education supplies special format educational materials to schools for students who are unable to use regular print. Special format materials include Braille (tactile symbols), Large Print (photographically enlarged texts), and Sound Recordings (read aloud and recorded on audiotape) and are designed to supplement or to replace the regular print text. Braille and Large Print are solely intended for use by students who are visually impaired. Sound recordings (audiotapes) are available for any student whose teacher requests them. All materials are lent free of charge from September to June, or any portion of the school year, to Manitoba teachers and students from Grades 1 through 12 and to students in postsecondary programs.

SPECIAL MATERIALS LIBRARY

A complete description of the Special Materials collection is now listed under three separate publications, ie. the 1983 Catalogue, the 1984-87 Supplement and this Update. We regret the temporary inconvenience this may cause but we are in a transition period as we are currently entering our collection in an automated database. This project will be completed as quickly as resources permit and, when accomplished, SMS will be able to produce collection listings either in entirety or by format (braille, large print, sound recording), or language or curriculum. In the meantime, should you not be able to find a required title in any of the three publications (Catalogue, Supplement, Update), please do not hesitate to place an order. Occasionally, titles listed may have subsequently been withdrawn due to loss, obsolescence, etc. If this is the case you will be notified immediately.

SPECIAL MATERIALS INTER-LIBRARY LOAN SERVICE

Sometimes, schools request textual or supplementary materials which are not available in the Special Materials Services Library. When this occurs, Special Materials Services will consult sources across Canada, in the United States and occasionally in Great Britain and France. Arrangements will be made on your behalf to borrow or to purchase the material if it is available elsewhere at no charge to you. This material will also be loaned to you for the school year or portion thereof that it is required.

SPECIAL MATERIALS PRODUCTION SERVICES

When the materials are not available, Special Materials Services may be able to produce them for you. If this occurs, as we do not hold print copies, we will then ask you to provide us with two (2) copies of the book and at the same time, we will write to the publisher requesting permission to produce the text in special format. Schools should allow eight (8) weeks or more from the time Special Materials Services receives ink print for completed production of audiotapes and large print format. For braille production, schools should allow sixteen (16) weeks for the initial volume and up to 15 months for completion of an entire braille text.

Braille transcription may be accomplished using either contracted braille, uncontracted braille or selected contractions. It is advisable therefore, that braille titles are requested in consultation with the Consultant for the Visually Impaired who is currently responsible for the student's program support, or with the Braille Production Coordinator at Special Materials Services.

TO THE PUBLISHER

Every attempt is made to secure copyright release of each title before it is transcribed into braille, large print or audiotape. We would welcome any information which will enable us to rectify any reference or credit in subsequent editions.

HOW TO USE THIS UPDATE

The Update is divided alphabetically by Curriculum Headings as listed in the Table of Contents. Major curriculum areas, Language Arts, Literature, Maths, Science and Social Studies are further subdivided by levels (Early, Middle and Senior Years). In instances where titles by grade (eg. 6-9) could be recorded under more than one level they will appear in both levels.

Within each curriculum level, titles are arranged alphabetically. In addition to the basic bibliographic information needed to correctly identify the title required - author, edition, publisher, copyright date - additional pertinent information has been added to every title in order to assist you in your selection. It is of course critical that you particularly note the format. When a title is available in more than one format, it will be listed separately for each format. Subject headings have been assigned to titles that may require further information as to their content matter. The number following each title is used for internal location searches and can prove very helpful to staff if recorded accurately and in entirety on the order form.

In addition, the main body of the Update is followed by an alphabetical title listing.

TO LOCATE A SPECIFIC TITLE IN THE CATALOGUE

1. Find the title in the title index.
2. Turn to the page number indicated in the listing.
3. Confirm that the author, publisher, copyright date and edition, (where available), correspond to those of the title you need.
4. Confirm that the format (Braille, Large Print or Sound Recording) and the Grade level) are the ones you require.

INSTRUCTIONS FOR ORDERING

1. Write or phone Special Materials Services, giving the name of the author, the title, the edition, and the copyright date exactly as they appear in the text. If the workbook is required rather than, or as well as the textbook, please state this clearly.

   * If you cannot decide precisely what the title is, please include all the words that appear on the cover or on the title page.

2. Please specify what date the material will be needed - e.g. Materials requested in September may not be required until February. Accurate dates are required as titles requested ASAP will be treated exactly in that manner.

3. Whenever possible, please use Special Materials Services request forms. Additional request forms are available from Special Materials Services.

4. Please allow three (3) weeks for delivery of materials in the Special Materials Services collection, eight (8) weeks for Inter-library Loan, and eight (8) to sixteen (16) weeks from the time Special Materials Services receives the ink-prints of materials not in the Special Materials Services collection.

5. Materials are lent, free of charge, for a period from September to June. Materials may be loaned and returned at any time during the school year. All materials other than those being renewed, should be returned to Special Materials Services no later than June 15th.

6. Extension of the loan should be requested in writing. This is of the utmost importance as the returned materials will be designated for use by other students the following school year.

Special Materials Services staff invite your questions, comments and suggestions about the materials and/or services we provide. If you are interested in seeing how the materials are produced, we welcome you to visit us in our offices at 1181 Portage Avenue.
